PROFESSIONAL EXPERIENCE:

2/74 to Present

William D. King & Associates, Inc.

Consulting services to provide the legal profession, corporations and trade associations with an experienced and professional approach to economic analysis.

Litigation Support Services Include:

1. Estimates of lost earning capacity in cases of death, injury or wrongful discharge.
2. Valuing closely held corporations.
3. Valuing the cost of care for disabled individuals.
4. Estimating financial damages.
5. Statistical analyses determining age, sex or race discrimination.
6. Valuing pension benefits in divorce.
7. Valuing advanced degrees in divorce.

Management Consulting Services include:

1. Financial forecasting and analysis.
2. Business plan development.
3. Market research and forecasting.
4. Competitor research and assessment.
5. United States liaison for foreign development authorities.
6. Internet research.
7. Technology appraisal.

Clients have included attorneys, investment banking firms, the State of Michigan, courts, corporations, private investors and start-up businesses and individuals

4/85 to 8/86 – Hayes-Albion Corporation

Organized and directed the development of long range planning for the automotive parts supplier with sales of over \$225 million and 10 operating divisions nationwide. Manufacturing and marketing strategies were designed to improve competitive position in the market through the uses of advances in information technology. The corporation was acquired by a larger manufacturer in the automotive industry.

9/80 to 4/82 – Economics Department, Michigan State University

Taught intermediate and introductory economics. Classes ranged in size from 80 to 400 students. Average enrollment per term was 200 students.

9/76 to 9/80 – Office of Institutional Research, Michigan State University

Forecasted enrollments, analyzed state appropriations, prepared revenue estimates for a budget of \$250 million. Reviewed forecasts of labor markets for M.S.U. graduates and Michigan's economic climate.

9/75 to 8/76 – Economics Department, Kent State University

Prepared research on statistical analysis of income determination by race, sex, age and household status. Also, developed an econometric model to forecast various energy sources.

9/73 to 5/75 – Michigan Department of Education

Managed financial reporting of several state and federal programs for the mentally impaired. Also, represented the department in assisting financially distressed school districts.
